

# HALF GONE!

**Half the 200,000 shares of pre-organization stock offered by the JEROME DAISY COPPER COMPANY at fifteen cents have been subscribed for.**

The issue apparently will be oversubscribed by many thousands of shares. So will the treasury stock to be offered later at a much higher price. The investing public seem to think that JEROME DAISY will be the next big Verde district winner.

## JEROME DAISY

*Is the company that is to develop Lucky Jim Mowle's Red Dyke group of thirteen claims lying north of the Arkansas & Arizona, less than a mile from the United Verde, a mile and a half from the United Verde Extension (Little Daisy) and on the same fault as both those famous properties.*

## JEROME DAISY

*Is Lucky Jim's present favorite, and he has the reputation in the Verde district of never picking a bad one. He made one fortune buying Little Daisy at 35 cents (now worth \$42) and another when he sold the North Verde claims to the Arkansas & Arizona company.*

## JEROME DAISY

*Is capped with an immense iron dike, and they say that wherever there is iron in the Verde district there is ore below. The rock right off the surface is fifty per cent iron, with low gold, copper and silver values. Conditions are such that the Jerome Daisy can be developed at much less cost than the Little Daisy, which has the biggest body of high-grade copper ore in the world.*

## JEROME DAISY

*Is capitalized for only \$1,000,000 with 2,000,000 fifty-cent shares. Only 200,000 shares of pre-organization stock are offered and the issue is going to be exhausted in a few days. Send your order by mail or telegraph. The money can follow by check, draft or portoffice order. He who hesitates will lose the opportunity to get in with Lucky Jim Mowles on his next big fortune.*
